Re: Sayton Road Reconstruction  
Village of Fox Lake  
Construction Commencement Notification

Dear Resident and/or Business Owner:

The Village of Fox Lake would like to notify you that construction of Sayton Road between US Route 12 & Rollins Road is scheduled to commence on or about Monday, July 9, 2018. This project is part of the Village's continued efforts to improve the infrastructure throughout the community, and is funded by a combination of Surface Transportation Program funds provided by the Illinois Department of Transportation and local funds provided by the Village of Fox Lake.

The scope of work includes drainage improvements, water and sewer improvements, new concrete curb & gutter, new asphalt pavement, improved pedestrian access including a new shared use pathway and improved pavement markings. The Contractor will be working Monday thru Friday from 7:00 a.m. to 6:00 p.m., and Saturdays as necessary. Of course, all scheduled work is weather dependent. We anticipate this project will be completed in the spring of 2019.

Please be advised that Sayton Road will be completed in several phases including one-way traffic configurations at times with reduced speed limits. Sayton Road will be closed to thru traffic with posted detour routes but will remain open for local traffic. As with any construction project, there will occasionally be inconveniences you may experience and we will be continually coordinating with the Contractor to minimize those disruptions. We ask that you have patience when traveling through the construction zone and be cautious of the workers and equipment. The project team thanks you in advance for your cooperation.

In an effort to keep the community informed, we have launched a project specific website which can be found at [www.saytonroadreconstruction.com](http://www.saytonroadreconstruction.com) or you can follow the link on the Village's website. You will be able to find more specific project information including project updates and schedules. You can also register to receive those updates via e-mail as well.

If you require assistance or have questions about throughout the project, please feel free to contact Kealan Noonan, Director of Public Works at (847) 587-3974 or Bill Klewin, Resident Engineer at (847) 344-4491 or via email at [bklewin@gha-engineers.com](mailto:bklewin@gha-engineers.com).
